

ZEN PLUS

Rocker

Pineapple

For many of us, a gentle rocking motion can be a source of comfort

It's especially true for those on the autism spectrum - rocking back and forth can help to minimise the impact of outside stimuli, providing a source of focus, and in turn, a feeling of calm.

The Zen Plus Rocker's heavily weighted design makes it safe and stable, while internal reinforcement provides the strength and durability required for challenging environments.

Zen Plus Rocker
1ZENRP1-400
1015H | 660W | 1115D (mm)
Weight: 59kg

Provides a source of focus and a feeling of calm
